D. Image Guidelines:

Product images are displayed on the search page and the product detail page. A professional image helps customers discover your product and can drive traffic to your product listings. Show customers what they will receive in their shipment (and only what they will receive). Make it easy for them to identify your product with a clear, high-quality image displaying exactly what you're offering.

General Image Guidelines

- Main image should have 100% White background
- The product must fill 85% or more of the image.
- MAIN images should be supplemented with additional images showing different sides of a product, or details that are not visible in the MAIN image.
- Each product must compulsorily have **minimum 4 images**
- Secondary images should complement the main image and can include relevant information.
- Main and additional images should not include logos or watermarks.
- Images should be 1000 pixels or more in either height or width as this will enable the zoom function on the website (zoom has been proven to enhance sales). Files measuring less than 500 pixels on the longest side will be rejected by our system.
- Secondary images can have non-white background (RGB value: 255,255,255)
- Detail shots where applicable need to be added
