

## STYLE GUIDE – HAIRBAND

A product detail page shows information about the product- including title, bullet points, product description and images. This data is crucial to ensure that customers will be able to find and purchase your products. Providing a consistent format for your listings will better inform customers and enhance the discoverability of your products.

In addition to using this document, we encourage you take advantage of the information available in our 'Help pages'.

#### D. Image Guidelines:

Product images are displayed on the search page and the product detail page. A professional image helps customers discover your product and can drive traffic to your product listings. Show customers what they will receive in their shipment (and only what they will receive). Make it easy for them to identify your product with a clear, high-quality image displaying exactly what you're offering.

#### General Image Guidelines

- Main image should have 100% White background
- The product must fill 85% or more of the image.
- MAIN images should be supplemented with additional images showing different sides of a product, or details that are not visible in the MAIN image.
- Each product must compulsorily have **minimum 4 images**
- Secondary images should complement the main image and can include relevant information.
- Main and additional images should not include logos or watermarks.
- Images should be 1000 pixels or more in either height or width as this will enable the zoom function on the website (zoom has been proven to enhance sales). Files measuring less than 500 pixels on the longest side will be rejected by our system.
- Secondary images Should have white background (RGB value: 255,255,255)
- Detail shots where applicable need to be added
- Include only what the customer will receive; no accessories unless they are accompanied with the product.
